Chronic kidney disease	Medium risk
Chronic lymphocytic leukemia	Medium risk
Chronic Obstructive Pulmonary Disease	Medium risk
Colorectal cancer	Medium risk
Coronary heart disease	Medium risk
Crohn's disease	Medium risk
Cutaneous malignant melanoma	Medium risk
Deep vein thrombosis	Medium risk
Depression	Slightly high risk
Diabetes mellitus type 1	Medium risk
Diabetes mellitus type 2	Medium risk
Diaphragmatic hernia	Medium risk
Diverticulosis - Diverticulitis	Slightly high risk
Dupuytren's disease	Slightly high risk
Fasciitis	Slightly high risk
Gallstones	Medium risk
Gastroesophageal reflux disease	Medium risk
General osteoarthritis	Medium risk
Glioblastoma	Medium risk

Glioma	Medium risk
Gout	Medium risk
Graves' disease	Medium risk
Haemorrhoidal disease	Medium risk
Headaches	Medium risk
Heart failure	Medium risk
Hyperlipidemia	Medium risk
Hypothyroidism	Medium risk
Inguinal hernia	Medium risk
Intracranial aneurysm	Slightly low risk
Juvenile idiopathic arthritis	Medium risk
Keratoconus	Medium risk
Lung cancer	Slightly low risk
Macular telangiectasia type 2	Medium risk
Migraines	Medium risk
Multiple myeloma	Medium risk
Multiple sclerosis	Slightly high risk
Myeloproliferative neoplasms	Medium risk
Myocardial infarction	Medium risk
Narcolepsy	Medium risk
Nasal polyps	Medium risk
Neuroblastoma	Medium risk
Non-alcoholic fatty liver disease	Medium risk
Non-medullary thyroid cancer	Medium risk
Non-toxic multinodular goiter	Slightly low risk
Open angle glaucoma	Medium risk
Oral cavity and oropharyngeal cancer	Medium risk
Osteoarthritis of the hip	Medium risk
Osteoarthritis of the knee	Medium risk
Osteoporosis	Slightly high risk
Pancreatic cancer	Medium risk
Parkinson's disease	Medium risk
Peripheral arterial disease	Medium risk
Primary Biliary Cirrhosis	Medium risk
Prostate cancer	Medium risk
Psoriasis	Medium risk
Restless legs syndrome	Medium risk
Rheumatoid arthritis	Medium risk
Schizophrenia	Medium risk
Sensorineural hearing loss	Medium risk
Squamous cell carcinoma of the skin	Slightly high risk
Systemic lupus erythematosus	Medium risk

Testicular germ cell cancer

Medium risk

Ulcerative colitis

Medium risk

Urolithiasis

Medium risk

Vitiligo

Slightly low risk

## Arterial hypertension

Arterial hypertension is a chronic pathology characterized by a continuous increase in blood pressure. It is a potentially serious silent disease directly related to coronary heart disease, vascular accidents, heart failure or renal failure. It has a high prevalence with more than one third of the population affected, being the main reason for medical consultation in the world.
